Instructions regarding usage of "Measures of symmetry" package

The application allows to load data from .csv files, as long as they are formatted in a specific way (exemplary data files containing left-skewed and right-skewed datasets were provided).

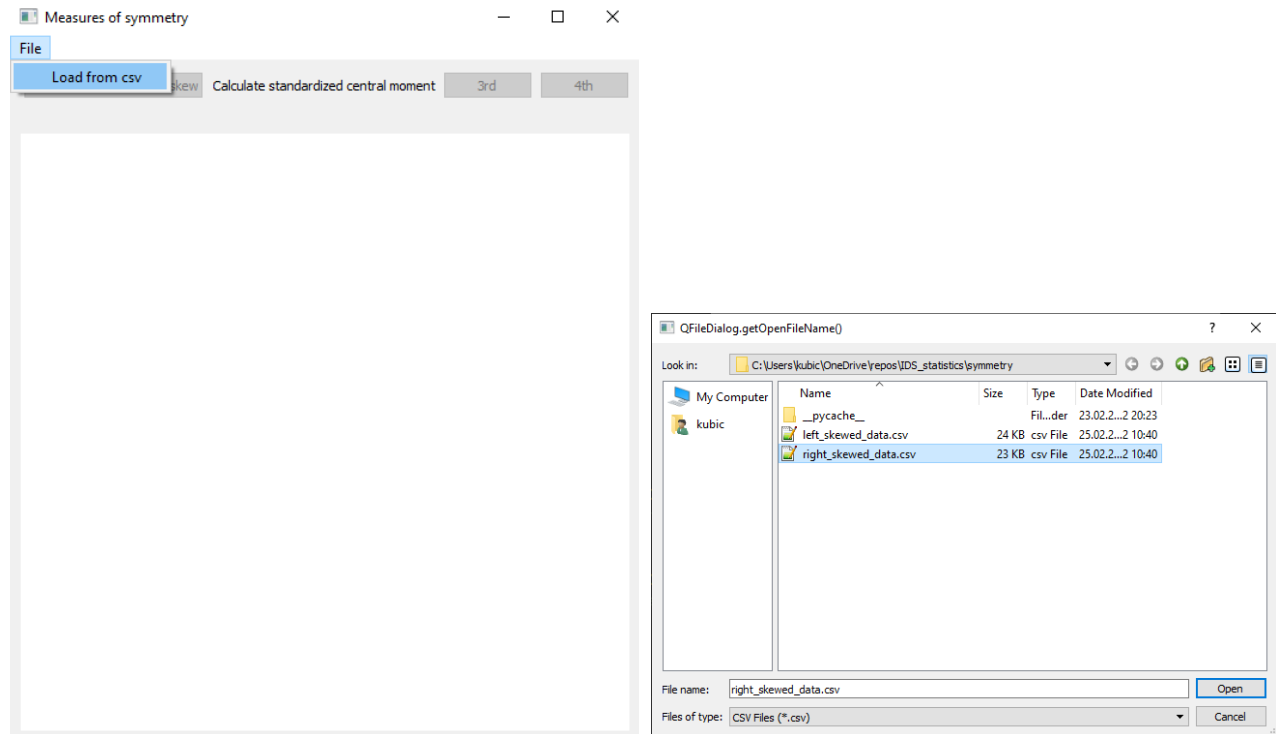

Figure 1: Data loading

Application allows to calculate nonparametric skew as well as 3rd and 4th standardized central moments.

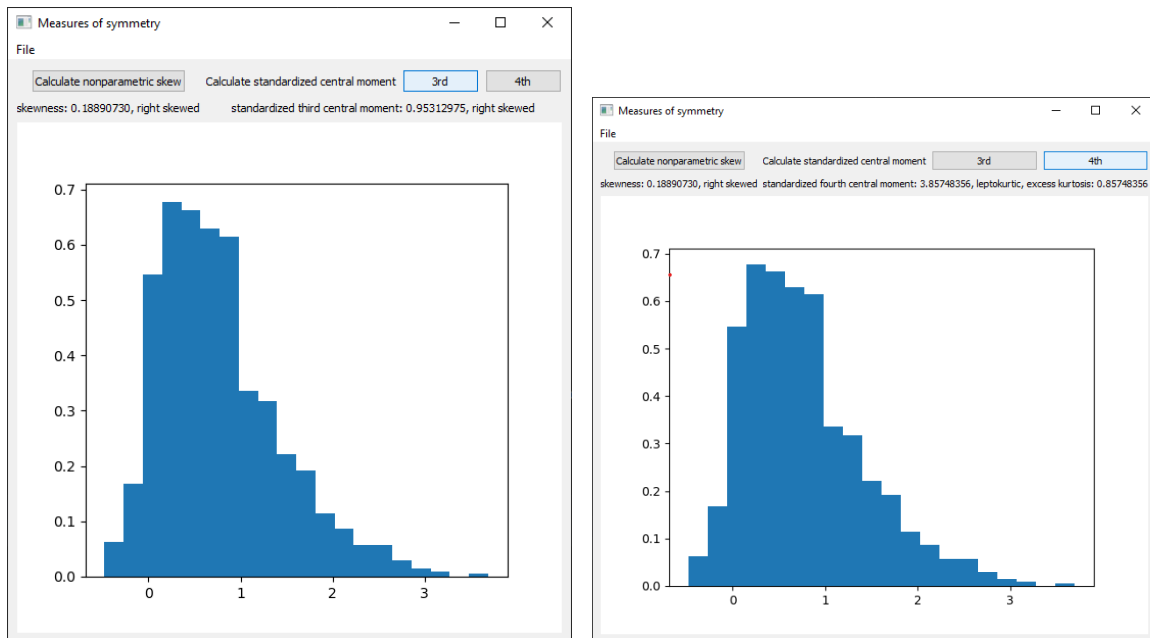

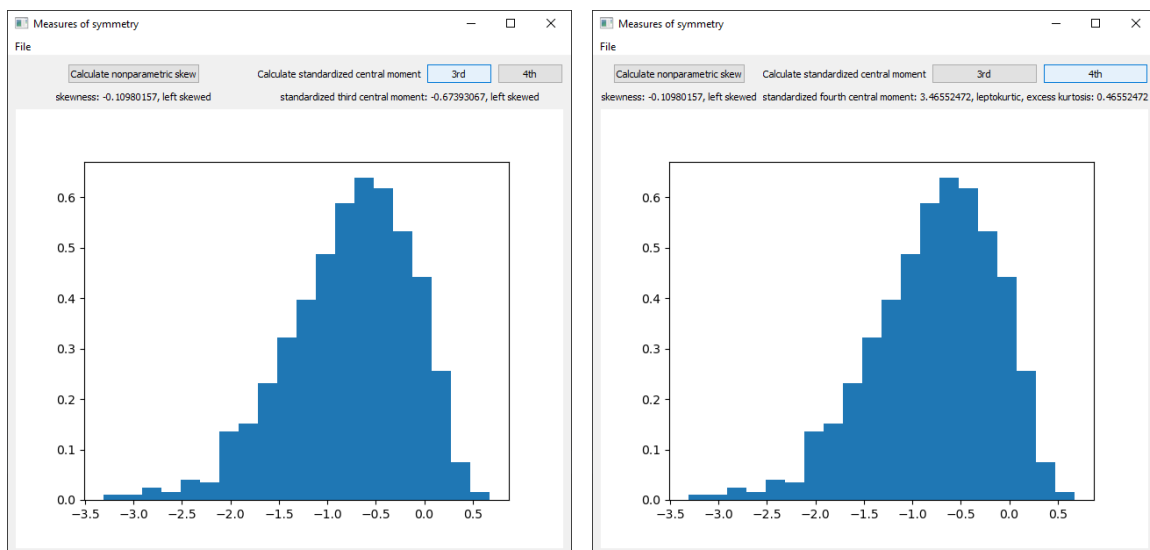

Figure 2: Calculations on right skewed dataset.

Figure 3: Calculations on left skewed dataset.
